

# GABRIELLE BLAIR

Asheville, NC, US • (612) 479 - 6711 • G.Blair2025@gmail.com

Data Analyst skilled in SQL, Python, ETL, and Tableau with a strong background in healthcare and operations. I specialize in transforming complex datasets into actionable insights that drive decision-making, streamline workflows, and enhance reporting accuracy. With proven experience in building scalable data solutions and ensuring compliance in regulated environments, I bring both technical expertise and business acumen to deliver measurable impact for organizations.

## Experience

JANUARY 2024 – DECEMBER 2024

**Data Analyst (Contract) | LifePoint Health | Remote**

At LifePoint Health, I utilized SQL and Python to query, clean, and analyze large datasets, producing insights that informed strategic initiatives and operational improvements. I restructured existing datasets by incorporating new features, which enhanced accessibility and reporting efficiency for leadership. Working closely with cross-functional teams, I optimized data models and aligned analytical solutions with evolving business objectives, ensuring data-driven recommendations directly supported organizational goals.

AUGUST 2022 – JANUARY 2024

**Junior Data Analyst (Contract) | AdventHealth | Remote**

At AdventHealth, I managed data transfers and reconciliations across multiple systems, maintaining accuracy and compliance with privacy and security standards. I employed advanced Excel and SQL queries to generate reports that improved visibility into key metrics and supported process improvements across departments. My collaboration with IT and operational teams resulted in the identification and correction of data inconsistencies, strengthening the reliability of reporting and enhancing overall workflow efficiency.

APRIL 2021 – AUGUST 2022

**Data and Operations Coordinator | Inspiration Company | Tampa, FL**

In this role, I streamlined data entry and reporting processes while maintaining the integrity of organizational records. I prepared and presented reports directly to leadership, including the CEO, which guided strategic decision-making. Beyond technical contributions, I supported team development by mentoring colleagues, fostering collaboration, and helping to scale departmental productivity through more efficient use of data.

JANUARY 2020 – APRIL 2021

**Operations Coordinator | Island Market | Tampa, FL**

At Island Market, I managed vendor orders and invoice approvals to ensure financial accuracy and process compliance, while overseeing customer service operations and daily transactions. I analyzed sales and operational data to identify trends that supported decision-making and improved customer satisfaction metrics. By coordinating across departments, I enhanced communication and streamlined workflows, contributing to greater efficiency and reliability in store operations. My role combined financial oversight with data-driven process improvements that supported the organization's growth and operational success.

## Education

JANUARY 2027

**Information Technology (BS) | WGU | MillCreek, UT**

OCTOBER 2024

**Certificate in Intuit Basics of Bookkeeping | Coursera**

OCTOBER 2023

## Certificate in SQL for Data Science | Coursera

### Skills

SQL, Python, ETL, Tableau, Excel, Data Cleaning, Data Modeling, UNIX/Linux, MySQL Workbench, Google Analytics, Microsoft Office/365, Networking, Critical Thinking

### Projects

***PatientIQ:*** Developed Python- and SQL-based ETL processes that improved database management and analytics workflows, enabling faster access to insights that supported business decisions.

***WGU Coursework:*** Built scripts in a Linux-based virtual environment to automate system tasks, optimize performance, and troubleshoot operational issues in virtualized infrastructure.

***Personal Project – Connect 4 Game in Python:*** Designed and implemented a fully functional game applying object-oriented programming principles, showcasing coding ability and problem-solving skills.
