**Dear Nishu,**

Kindly confirm the details below regarding the pay rate and Right to Represent for the following opportunity, keeping your employer in loop.

---

**Right to Represent and Pay Rate Confirmation**

**I, Nishu Teotia, confirm my consent to the following:**

- **Pay Rate: \$65/hr C2C.**
- **Exclusive Authorization: I hereby authorize Flexon Technologies to exclusively represent me for the position of Onsite Backend Engineer / Platform Engineer with TCS/Apple, for the role based in Cupertino, CA on a Contract basis.**

I also agree to undergo any background checks and drug testing required by the client if my profile is shortlisted.

Furthermore, I confirm that I have not submitted, nor will I submit my resume to any other vendor for this specific opportunity to avoid any duplication of submission for this requisition.

**Sincerely,**

**Nishu Teotia**

- I-94 Copy/ Document number
- DL Copy/State ID
- Last 4 SSN
- Did you work with TCS prior ? ( If yes Fulltime/Contract + mention BAID + Reporting Manager + TCS Vendor name)
- LinkedIn Id

**Job Title: Backend Engineer / Platform Engineer**

**Location: Cupertino, CA**

**Client: TCS / Apple**

**Type: Long term contract**

---

**Job Summary:**

**We are seeking a highly skilled Backend Engineer / Platform Engineer to join our team in partnership with a leading technology client in Cupertino, CA. The ideal candidate will have deep experience in designing scalable backend architectures, implementing RESTful and GraphQL APIs using Node.js, and working with distributed systems. Familiarity with modern AI/ML technologies, containerized platforms, and cloud services is highly desirable.**

---

**Responsibilities:**

- Design and implement backend services using Node.js, ensuring scalable and maintainable code
  - Develop and manage RESTful and GraphQL APIs
  - Architect and implement distributed systems using Domain Driven Design (DDD) and Service-Oriented Architecture (SOA) principles
  - Ensure system performance, reliability, and observability across services
  - Collaborate with cross-functional teams to integrate backend services with various front-end platforms and business systems
  - Manage authentication and authorization using OAuth 2.0
  - Contribute to CI/CD processes, containerized deployments, and infrastructure as code (e.g., using Docker, Kubernetes, Terraform)
  - Stay current with emerging trends in AI/ML, particularly LLMs and AI agent frameworks (e.g., LangChain, Google ADK)
- 

**Minimum Qualifications:**

- Bachelor's degree in Computer Science, Engineering, or a related field (or equivalent professional experience)
- 7+ years of experience in software architecture and backend development

- Strong expertise in:
  - Domain Driven Design (DDD)
  - Service Oriented Architecture (SOA)
  - Distributed Systems
- 3+ years of hands-on experience with:
  - Node.js
  - RESTful and GraphQL API development
- Solid understanding of:
  - Asynchronous programming
  - Type safety
  - Threading models
  - State machines
  - Data structures

---

**Preferred Qualifications:**

- Experience with AI/ML technologies including:
  - Large Language Models (LLMs)
  - AI Agents (e.g., LangChain, Google ADK)
- Familiarity with:
  - Docker and containerized application development
  - Kubernetes, Terraform, and related orchestration tools
- Experience with:
  - Managed cloud platforms such as AWS, GCP, Azure
  - Monitoring and observability tools for distributed systems
- Solid understanding of OAuth 2.0 (authentication, delegated authorization, etc.)
- Excellent written and verbal communication skills; ability to work with both technical and non-technical stakeholders

**Regards**
