## Sonoco/ Toppan, Franklin Park, IL— *Thermoforming operator/ Packer*

Jan 2025 - June 2025

- Inspected and packed thermoformed plastic trays in accordance with quality control standards prior to shipment
- Operated thermoforming machinery including, performing startups, splice changes, maintaining continuous production efficiency, shutdowns, and splice changes.
- Collaborated with lead operators and maintenance teams to troubleshoot equipment malfunctions and minimize downtime.
- Accurately completed production documentation including line startup forms, run-time logs, and performance reports.
- Oversaw scrap management by monitoring grinding machine output, ensuring separation of scrap materials, and maintaining compliance with safety procedures.
- Operated forklifts and electric pallet jacks to efficiently organize and transport products as required
- Coordinated with shift leaders and quality assurance teams to ensure seamless production.
- Demonstrated high attention to detail and adherence to safety standards in a high volume manufacturing environment.

## Midland Manufacturing, Skokie — *Assembler/Warehouse Technician*

May 2023 - May 2024

- Reviewed technical work blueprints and work orders to assemble tank car valves accurately.
- Utilized Pneumatic tools, torque wrenches, power tools, drill press, sawbench, deburring machine, and tester for precise assembly and testing of components.
- Consistently exceeded daily production quotas, contributing to revenue growth and work efficiency
- Performed Quality assurance inspections to ensure compliance with customer specifications.
- Managed inventory for current and upcoming work orders and organized parts using forklifts to optimize workflow.
- Contributed to continuous improvement cycles by actively suggesting and implementing new ideas to enhance safety, workflow efficiency, and overall production performance.

## Precision Plating, Chicago — *Machine Operator*

2018-2019, 2024

- Operated and monitored reel-to-reel plating machinery performing routine checks and tooling replacements.
- Maintained chemical tank levels and ensured compliance with production standards.
- Conducted quality inspections and partnered with quality assurance teams to exceed customer requirements and production standards.
- Documented production data and machine performance logs.
- Reviewed work orders and optimized the electroplating process through machine adjustments for various materials.

## Education

Alcott College Prep• High School Diploma• Chicago, IL

## Skills

Machine Operation • Quality Control • Warehouse Management • Inventory Control • Forklift Operation • Blueprint Reading • Troubleshooting • Safety Compliance • Production Documentation
