Dear Mani,

Of course, I have extensive experience with US GAAP as well as general accounting principles, SOX compliance, and a thorough understanding of cost accounting.

While I do not have direct experience in the pharmaceutical, medical device, or life sciences industries, I have significant expertise in processing and manufacturing environments. I believe these fields share many of the same operational and cost accounting processes, which would allow me to quickly adapt and contribute effectively.

Kind regards,

Joseph Botros

Hi Joseph,

Thank you for confirming the rate.

To help us further assess your suitability for the Sr. Analyst: Cost Accounting position, could you please confirm if you have knowledge of US GAAP and SOX, general accounting, and a thorough understanding of cost accounting, preferably within the pharmaceutical, medical device, or other life science industries?

Thanks,  
Mani
